Recognition at VMware

Raja Sachin

We appreciate the work you did for migrating RDS to Data cluster. It was a very complex problem to solve but you did great. Now we have moved all our instances in development and about to migrate production ones. Though its on hold for now, but you had ensured that all the learnings from this work can be leveraged in current critical work for TMC SelfManaged and RDS encryption.

I would like to take this opportunity to thank your relentless effort, hard work and result oriented approach.

Wish you all success. Thank you!
